Ergonomic Shelf Trucks

1200 lbs. Capacity

Ergonomic handle provides a more natural, comfortable grip that reduces wrist strain. The 2 swivel and 2 rigid 5" x 1-1/4" casters with non-marking polyurethane wheels provide the best combination of reduced rolling resistance and quiet operation. Wheel brakes on swivel casters are standard. All-welded construction with heavy 12 gauge shelves, these units ship fully assembled and ready for use. Bottom shelf has a 1-1/2" retaining lip for small parts. Top shelf is 35" above ground, and is available flush or with 1-1/2" retaining lips.

6-Inch Deep Shelf Trucks

The extra carrying capacity of the 6" high shelf lips, combined with the heavy 12 gauge welded construction, make these trucks ideal for heavier applications. Shelves are formed from a single sheet of steel and welded in place, resulting in an extremely rigid, durable unit. Polyurethane casters roll quietly and more easily under heavier load conditions. Clearance between shelves is 16-1/2".

Caster Steer Trailers

2000 lbs. Capacity

This versatile unit can be used as an independent platform truck for manual order picking and then quickly connected into a train of trailers. The caster steer design means wheels stay under the load at all times, providing better stability with unevenly distributed loads. The two swivel casters rotate 360°, providing excellent maneuverability even in tight areas.

Model
CS-3060-8MRHD

- Reinforced 12 gauge steel deck is 11" high
- 8" x 2" mold-on rubber wheels with cast iron centers and roller bearings
- Removable pipe rack/pushbar handle extends 29" above the deck
- Ring drawbar stays in upright position for manual operation as a platform truck
- Pin and clevis coupler at rear

Pin & Clevis Rear Coupler

Versatile ring type wishbone coupler with 2-1/2" I.D. ring can also be used with most pintle hitches.

Wishbone half of coupler stands upright when not in use.

DOUBLE 5TH WHEEL STEER

Tracking Trailer

2000 lbs. Capacity

The pivoting axles of these trailers are connected by a tie rod which turns the front and rear wheels in opposite directions. This design provides agile maneuvering of individual or multiple trailers in narrow aisles and around tight corners. A rear hitch on the four wheel steering trailer allows multiple trailers to track in the path of the lead trailer.

- 12 gauge steel deck with boxed edges has reinforced understructure.
- 16" pneumatic wheels with 1" roller bearings.

HEAVY-DUTY Wagon Trucks

Up to 3500 lbs. Capacity

Fifth wheel steering describes a type of steering where the front wheels and axle assembly pivot on a center point, which is referred to as the fifth wheel. Because the steering wheels encounter less friction when turning than would be encountered in a swivel caster, wagon trucks with fifth wheel steering can be easier to maneuver under heavier load conditions. This is especially true when softer, wider pneumatic wheels are required because of use on rough or uneven surfaces. Wagon Trucks with this type of steering are typically pulled, but can also be pushed. T-handle with vinyl handgrips allows two man operation.

- Heavy 12 gauge reinforced steel decks with 1-1/2" retaining lip, or flush edge.
- Full 1-inch diameter axles and roller bearing wheels.
- Structural channel undercarriage for heavier loads and durability.

Pan Steel Decks are standard with a 1-1/2" retaining lip. For Flush Steel Deck, add: **-FSD** to model number.

Wagon Trucks

1200 lbs. Capacity

Fifth wheel steering combined with choice of puncture-proof solid rubber wheels, or cushion load pneumatic wheels make these trucks ideal for maneuvering over rough surfaces. Pull handle has vinyl hand grip. Deck size is 24" wide x 36" long. Available with a flush deck or with a 1-1/2" lip-up. All models ship via UPS. Durable powder coated red finish.

Steel Deck

Welded 12 gauge steel for maximum durability. Available with 1-1/2" retaining lip, or with flush edges for easier sliding on and off. **Ships fully assembled, ready for immediate use.**

Fixed Rack Deck Clearance Bars

Fixed Rack Deck Bars are used to provide fork truck clearance to non-palletized loads. The unit fits over your pallet racking beams with a 2-1/2" waterfall that is pre-drilled to accept a locating screw. The 3 - 12 gauge supports are securely welded to the frame providing fixed spacing between the supports, making loading and unloading easier. The bars are 46" wide and are available in 3 standard racking depths - 36", 42", 48".

Spill Control Platform for Cabinets

Gain an extra measure of spill control for your safety cabinets. Constructed from heavy-duty 12 gauge steel, this all-welded sump measures 20" deep x 45" wide x 6" high. Designed to accept most 18" D x 43" W safety cabinets, the platform will contain up to 25 gallons securely and keep any leakages off your floor. Your cabinet sits recessed in the platform by 1" which will allow the cabinet doors to fully open. The low profile design and steel braces in back ensure easy loading of your empty cabinet. Durable gray powder coated finish.

Spill-Control Platforms

Heavy-gauge steel construction holds up in applications where plastic units just won't do, either for durability reasons, or when materials being stored are not compatible with plastic. Welded steel bar grating is removable for easy clean-up. Drip channels "hook" units of same heights together, and help prevent drainage between units. Optional ramps available in 2 heights. All models help you comply with EPA and OSHA requirements; models with 66 and 99 gallon capacity help you comply with Uniform Fire Code.

IBC Containment & Dispensing Station

Heavy-gauge steel construction for durability and extended life. Large 400 gallon sump capacity with 10,000 lbs. load capacity. Steel grating deck panels are easily removable for cleaning. Includes drain plug and grounding screw for safer handling of flammable liquids. Helps you comply with EPA requirements.

SINGLE IBC UNIT

Large deck surface has room for additional storage. Three-piece steel grating deck is 29" high. "Convertible" deck allows IBC to be positioned for internal dispensing within sump area. Included pail holder shelf attaches conveniently to inside or outside of sump.

Model No.	Overall Size	Capacity	Wt. (lbs.)
SST-IBC	51"W x 76"L x 29"H	400 gal	625

DOUBLE IBC UNIT

Convenience of storing 2 IBC's side by side, and a lower profile for easier access. Four piece removable grating deck is 23" high. Includes 2 removable pail holder shelves.

Model No.	Overall Size	Capacity	Wt. (lbs.)
SST-IBC-2	51"W x 99"L x 23"H	400 gal	702

**Model
SST-IBC**

Left: Positioned lengthwise with IBC moved back, there is sufficient room to hang pail shelf on inside of sump (one decking panel is removed).

Below: Positioned widthwise, Pail Shelf can be hung outside of sump, allowing extra storage space on deck.

ERGONOMIC Bar Cradle Truck

3000 lbs. Capacity

Ergonomic 20" Bed Height - Less bending means easier loading and unloading, and keeps material closer to most machine heights.

Highly Maneuverable - Four swivel casters with 6" hard tread phenolic wheels allow movement in any direction. Useful in tight work areas with long loads and when moving around corners.

3000 lbs. Capacity Each - Use for both transport and storage. Combine multiple units for greater capacity and to support longer loads. Loads on single units must be centered on truck.

60" Tall Hand Truck with Patented Foot Kick

800 lbs. Capacity

Carry more and make fewer trips with this extended height hand truck. The foot kick gives you extra leverage on heavy loads when starting. Simply tilt the hand truck back while using your foot to push the base forward. Frame stands 60" tall. The large 13-1/2" deep x 1/4" thick nose plate with tapered front edge measures 16" at the back. Frame is made from 1.05" diameter 14 gauge steel tubing and is fully welded for strength and rigidity. Wheel guards protect the wheels from the load. Also available with a folding foot kick, which is designed to fold up and lock out of the way when not in use.

Perforated Deck Hand Truck

The perforated 48" high deck is ideal for loading boxes when in a horizontal position. The 64" overall height supports large oversized loads. The large 13-1/2" deep x 1/4" thick nose plate measures 16" wide at the back with a tapered front edge which allows it to easily glide under the load. The 1.05" diameter 14 gauge steel tubing frame is fully welded for strength and rigidity. Wheel guards protect the load from the wheels.

Shovel Nose Hand Truck

800 lbs. Capacity

Large 1/4" tapered nose plate is 13-1/2" deep, widens to 16" at rear. Beveled leading edge is easier to slide under loads. Frame and extra high 29" stair glides are 1.05" 14 gauge tubing for strength and rigidity. Wheel guards keep loads away from wheels. All frame styles feature 4 curved ribs with vertical center brace and zinc plated adjustable D-Axle. Available with a Continuous, Dual, or Loop handle.

Available with Patented Foot Kick Option

The foot kick gives you extra leverage on heavy loads when starting. Simply tilt the hand truck back while using your foot to push the base forward. You will be amazed how much easier it is to start out. Your choice of fixed position standard foot kick or folding foot kick which is designed to fold up and lock out of the way when not in use.

Work-Height Mobile Workstation with writing shelf, drawers, and pegboard

12 gauge top shelf is 42" high, making this a perfect standing workstation. 16 gauge steel pegboard extends 24" above workbench. Pegboard holes are on 1" centers and accept most standard hooks. Louvered panel available in place of pegboard. Two locking storage drawers. Writing shelf measures 21" wide x 12" deep and has a sloped storage pocket underneath. Two swivel and two rigid total lock casters with 5" polyurethane wheels. Total lock casters keep the unit locked in place when in use. (Bins and hooks not included.)

Receiving Station

2000 lbs. Capacity

All-welded, heavy-duty construction. Top surface, measuring 24" deep x 36" wide, is enclosed on three sides with flush front edge to provide an open writing surface. The height can be set from 39-1/2" - 42-1/2" above the floor. The 3 shelf version has 13" of clearance between the three shelves and the 2 shelf station has 27" of clearance. Riser measures 10" deep and is 12" above the writing surface, allowing storage of most 3 ring binders. Floor glides adjust to almost any uneven floor surface.

Welded Steel Workbench with Hardboard Top

Capacities to 5000 lbs. UDL

1/4" hardboard surface, attached directly over 12 gauge steel top, helps to deaden the sound of heavy blows and metal to metal contact. 12 gauge steel top is double-reinforced with angle iron on the underside and gussets in the corners for exceptional strength and rigidity. These all-welded units ship fully assembled and ready for immediate use.

Continuous Width Production Tables

3000 lbs. Capacity

Ideal for assembly lines. No stringer means working from both sides!

Heavy-duty 12 gauge tops are available in either 30" or 36" depth with reinforced understructure and strengthening gussets. Tops come in 4, 5, and 6 ft. widths to allow for an infinitely continuous work surface in 1 ft. increments (excludes 7 ft.). Starter kit includes (1) table top, (2) leg sets, and (4) gussets. Each additional Add-on kit includes (1) table top, (1) leg set and (4) gussets. Legs and gussets bolt to table-tops with included hardware. Ships flat. Overall height is 36". Gray powder coated finish.

Butcher Block Top Tables

These 1-3/4" thick butcher block tops have a two-coat catalyzed varnish finish, and are attached to an all-welded, angle steel frame for unmatched rigidity and strength. The impact resistant, hardwood tops are nonconductive, resist damage from heavy blows, and provide an extremely durable, yet "forgiving" work surface. All models are fully assembled and ready for immediate use.

Adjustable Height Heavy-Duty Machine Table

10,000 lbs. Capacity

7 gauge steel top and heavy 2" x 2" leg construction are used to make a heavy-duty machine table that will meet the most demanding application. Adjustable legs allow table height positioning from 30" to 37" high with 1" increments.

Size	Model No.	Wt.

MTH1-2830-AH

7 Gauge Mobile Machine Table

3600 lbs. Capacity

This mobile version of our heaviest machine table has 4 swivel 6" x 2" phenolic casters for ease of movement when the need arises, and wheel brakes to keep it stationary the rest of the time. Top is formed from 3/16" thick steel. Legs are 2" x 2" x 1/4" structural angle iron. Welded – no assembly required.

Wheel Selection Guide

Polyurethane Wheels

Load Capacity Range:
300 – 1,000 lbs.

Characteristics: Easier rolling for higher capacities, long-lasting, chemical resistant, non-marking and quiet operation.

A polyurethane tread is superior for industrial, warehouse, and institutional applications with a great combination of easy rolling and maneuverability under heavy load capacity while able to quietly roll over rough floor surfaces.

Mold-On Rubber Wheels

Load Capacity Range:
500 – 600 lbs.

Characteristics: Better load capacity, long-lasting, cushion tread, absorbs shock and vibration, floor protection and quiet operation. Rubber tread vulcanized to metal core. A good combination of load capacity and cushion tread that quietly rolls over rough floors. A great wheel choice for heavy industrial and warehouse applications.

Pneumatic Wheels

Load Capacity Range:
300 – 400 lbs.

Characteristics: Great cushion ride over rough floor surfaces, best option for traveling over small obstructions or outdoor applications. Best shock and vibration absorption.

An air filled rubber tire on a metal hub is able to easily roll over uneven surfaces and bumps but does require air pressure management. Under heavy loads, the pneumatic tire profile will compress, creating greater rolling resistance. Ideal for handling fragile loads over rough surfaces.

Phenolic Wheels

Load Capacity Range:
900 – 1,250 lbs.

Characteristics: Best rolling for heavy load capacities, long-lasting, chemical resistant, high temperature, non-marking for smooth floor surface.

A solid one piece wheel that is high pressure molded with reinforced fiber-filled phenolic resin. Offers the least rolling resistance on smooth floors, but does not absorb vibration over rough surfaces.

Solid Rubber Wheels

Load Capacity Range:
300 – 400 lbs.

Characteristics: Good load capacity, great for rough floor surfaces, puncture-proof, floor protection and quiet operation.

Cushioned rubber tire that is more stable and easier to roll under heavy loads than pneumatic wheels. These wheels are a rugged, maintenance-free (no air pressure to maintain) alternative to pneumatic wheels.

Flat Free Hand Truck Wheels

Load Capacity Range:
400 lbs.

Characteristics: Wide rubber tread disperses the load better over irregular or softer surfaces. Less tread compression than pneumatic or solid rubber tires and precision ball bearings improve rollability of heavier loads.

Wheel Specifications

Wheel Diameter	Tread Width	Wheel Type	Bearing I.D.	Centered Hub Model No.	Offset Hub Model No.

SPECIFICATIONS: If any particular dimension or specification is critical, it should be verified at time of order placement.

CAPACITIES: All capacities are based on Uniformly Distributed Loads (UDL). Do not exceed load capacities.

WARRANTY: Any product that has been subjected to normal use for which it is intended and is shown to be defective within one (1) year from date of purchase will be repaired or replaced at seller's option, provided such defect is reported promptly to the manufacturer. Authorization is required prior to returning.
