# RACK AISLE SAFETY

## Prevent Materials from Falling into the Aisles !

Wireway Husky's *Aisle Shield* is the economical answer to aisle safety and the increasing demands of regulatory agencies for fall protection into pallet rack aisles.

Before

After

Extension support for guards above Pallet Rack height.

The new *Aisle Shield* design features heavy duty 8-gauge welded wire, stiffened with innovative longitudinal flutes. Easily installed with specifically engineered eyebolts, this elegant product combines simple and fast installation with the rigid protection of steel.

Eyebolt parts assembly

The high-visibility panels attach to pallet rack systems using specially-designed eyebolts. The eyebolts allow for an offset — away from the back of the rack of up-to 6 inches. “Flush mount” is also available (with 1” offset to allow for decking overhang, and so that the beam can be removed without disturbing the panel).
