- * Powerful, easy to operate!
- * Sturdy construction
- * Excellent cabinet air turnover time

Pressure Blasting Systems

	PT-100	PT-100 SK
Media Capacity	100 lbs.	100 lbs.
Tank Diameter	12"	12"
Hose Length	10' ID	10' ID

Our pressure blasting systems are extremely powerful and mobile. The PT-100 features 6" rubber wheels. It features an ACSME cpde vesse;, pressure relief valve, and include safety goggles.

The PT-100 SK is our "side kick" unit. It can be combined with an enclosed blast cabinet to bring pressure blasting power inside an enclosed media blast cabinet.

Both units are extremely powerful and

Benefits of Cyclone Cabinets

The standard lineup cabinets above ALL include our DC-1500 90 CFM dust collector. These cabinets are all 16 gauge steel, precision welded and each cabinet is sealed to help prevent leaking. These units require 110 Volts (US AC) and include a switch/outlet box on the cabinet. They feature an E26 base light socket, rated at a max 100W incandescent bulb, but lighting type is your choice (incandescent/LED/CFL). A 3' electrical cord is included with a standard NEMA male receptacle.

These units feature side access doors which provides the user with a convenient access portal to the work area. Our equipment is solidly built, when you close the door, you know it seals but ease of use was included in our design.

Popular upgrades to our cabinets, depending upon needs, are tungsten carbide nozzle and orifice, and our 400 CFM dust collector, our DC-4000. All units come with unlined rubber gloves and ship from Dowagiac, Michigan.

Made in the USA

For us, it is not just a statement. We put local people to work and we take great pride in doing so. Our fabrication and painting is done by our own engineers

Replacement Parts

Abrasive media blasting takes its toll on any blast cabinet. Thankfully, Cyclone has knowledgeable staff and a full catalog of parts to keep your uptime maximized. We stock and can drop ship parts for our cabinets anywhere you

Benefits of Cyclone Cabinets (Continued)

The models listed with "FT" indicate a "Full Top" opening configuration providing users with a greater access to pieces in the workspace. The FT models, excluding FT-3522, also come with our DC-1500 90 CFM dust collector. We can easily upgrade these units to tungsten carbide nozzles and our DC-4000 400 CFM dust collector upon request.

Model BT-20		
Overall Dimensions		
28"H	20"W	18"D
Working Dimensions		
12"H	19"W	18"D
Weight	55 lbs. (UPS)	
Lid Style	Top Opening	

The BT-20 offers big power in a bench-top size unit. Don't be fooled by the size, we still use 16 gauge steel and seal the unit just like its bigger brothers. This unit can be shipped by UPS and does not come standard with a dust collector, but we suggest adding on our DC-1500.

Maintenance Kit

The maintenance kit brings new life to an old cabinet. It includes one pair unlined rubber gloves, one pack of 12 mylar shields, one 14 CFM ceramic nozzle, one 14 CFM ceramic orifice, and one pair 24" unlined rubber gloves.

An economical alternative to buying individual items
