GENERAL INFORMATION

Glosstex, a vinyl coated fabric, is widely used in Dandux fabric trucks. This durable fabric has a smooth, glossy and snag-less surface making dirt and grease easy to remove.

Poly products such as liners, tubs and trucks comply with Federal Flammability Regulations 16CFR1500.3 and CFR 1500.44 as not a flammable solid.

Any Dandux plastic product shown in this catalog can be manufactured with FDA accepted resins for use with food and or pharmaceuticals. The Dandux USDA Poly Taper truck is listed in USDA Bulletin MP1-2.

This catalog provides an overview of the most widely used Dandux products. Due to our multiple disciplines, C.R.Daniels, Inc has the ability to custom manufacture using fabrics, plastics and metals to meet your specific needs.

This catalog is for general information purposes only. We reserve the right to make changes without notice in materials, equipment, models, colors and specifications.

Neither manufacturer nor seller shall be liable for any injury, loss or damage, direct or consequential, out of misuse of or the inability to use the product.

Custom products, stenciled units, fabric trucks in colors other than white canvas or yellow Glosstex and customized or modified poly products are not subject to return.

Dandux and Glosstex are registered trademarks of C.R. Daniels, Inc.

All stated sizes are nominal.

DANDUX COLOR OPTIONS

Use our selection of Dandux colors to brighten and enhance the image of your workplace. Ideal for color coding departments, business entities or work in process. A must in the manufacturing, administrative, government and retail environment.

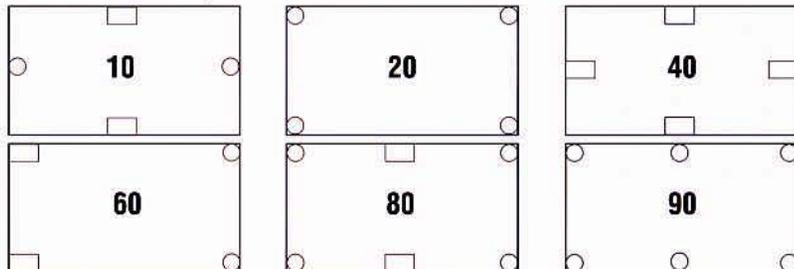

All standard colors are available for Dandux poly products with no minimums required. In addition, we can custom match colors to meet your special needs. Minimum quantities may apply to custom applications.

Dandux fabric trucks are available in standard colors of heavy-duty white canvas or yellow Glosstex. Most Dandux fabric trucks are also available in the five additional Glosstex colors. Minimum quantities may apply to specially colored fabric trucks.

DANDUX CUSTOM APPLICATIONS

C.R.Daniels, Inc. has been manufacturing Dandux products since 1918. This manufacturing experience and in-depth industry knowledge lends itself to custom manufacturing. Provide us with the specifications and designs necessary to meet your special needs and C.R.Daniels, Inc. will custom manufacture a truck, basket, container or other item using either Fabric, Plastic, Metal or a combination of any or all three materials.

DANDUX EXTRA DUTY TRUCKS

Dandux Extra Duty Trucks (400-700 Series) are the most widely used and versatile in the industry. Our trucks are consistently used in laundries, dry cleaners, textile mills, garment plants, hotels, motels, healthcare facilities, libraries, mail rooms, locker rooms, commercial buildings, government buildings, construction sites and recyclers. Dandux Extra Duty Trucks have applicability in just about every industry and can be used for everything from delicate linens to heavy metal parts; anywhere there is a need to move, stock, store, count or protect.

Trucks are available in multiple bushel sizes in heavy-duty canvas or our trade marked Glosstex™. All critical wear points including the top rim are reinforced for extra strength and durability and come standard with a convenient card pocket on one end and fabric handles on each end for ease of movement. Standard colors are plain white canvas and yellow Glosstex. Optional Glosstex colors of red, green, blue, gray or white are available (Minimums or up charges may apply). The frames are made of high tensile strength, electro-welded spring steel and the frame bottoms are welded plated flat steel bolted to kiln dried hardwood runners and caster boards. Casters come equipped with thread guards and are available in a variety of caster patterns and optional sizes. Our material selections and quality construction result in extended product life, cost effectiveness and increased productivity.

Caster Patterns

Refer to Caster Chart on Page 2

DANDUX EXTRA DUTY BASKETS

Dandux Extra Duty Baskets (400-100 Series) have all the qualities of the Dandux Extra Duty Trucks without the casters and caster boards. Both trucks and baskets can be nested when empty for space savings and ease of shipment.

Custom fabrication available to meet specific needs. Contact your Territory Sales Manager or Customer Service for assistance.

OPTIONAL ACCESSORIES

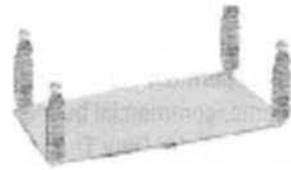

Replacement Liners

An economical way to restore your Dandux Extra Duty Truck or Basket is with our easy to install canvas or Glosstex Replacement Lace-On Liner (Series 40-65). Liners come standard in plain white canvas or yellow Glosstex, with optional Glosstex colors of red, green, blue, gray or white. (Minimums or up charges may apply). Liners have rustproof grommets in a reinforced hem for lacing to the frame.

Platform Lift

Want to make loading and unloading your Dandux Truck or Basket easier, faster and safer? Then a Dandux Platform Lift is the answer. These lifts are an ergonomically correct way to move the load up to or away from the operator. Available in two styles: Plywood (Series 40-890) or a strong metal frame covered with yellow Glosstex (Series 40-897). Equipped with either bungee cords or canvas covered springs. See page 11 for information on Platform Lifts for Poly Taper Trucks

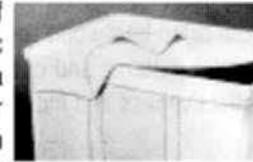

Sanitary Cap

Use a Dandux Sanitary Cap (Series 40-87) to protect the contents of your Dandux Extra Duty Truck or Basket from dust or dirt while in transit or storage. White in color, this long lasting nylon fabric is held in place with a strong elastic band. Available in bushel sizes 6 thru 20.

Sanitary Liners

Dandux Sanitary Liners are made of durable white nylon and have an elastic cord sewn into the hem to create a snug fit. Idea for soiled liner: the liner can be removed and washed along with or separate from the liner. Available models are with a flap over cover (Series 40-85F) or without the flap (Series 40-85) in sizes 6-20 bushel.

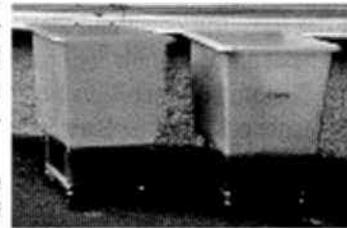

ELEVATED TRUCKS - BASKETS

Dandux Elevated Trucks and Baskets (Fabric or Poly) are perfect for use in dry cleaners, coin-op laundries, cut and sew operations, factories, and retail stores. A must for under counter storage, narrow aisle applications or anywhere that space is an issue. Dandux Elevated Trucks and Baskets are operator friendly by eliminating bending to place or retrieve items from the bottom of the unit. Dandux Elevated Baskets provide all of the above benefits while remaining in the stationary mode. Dandux Elevated Trucks add the feature and benefit of mobility.

The fabric body model (Series 40-130 and 40-130C) come standard in heavy duty white canvas or yellow Glosstex and are reinforced at all critical wear points. The frame is made of high tensile spring steel that is electro-welded at all intersections. The liner supports are plat-

ed flat steel and are also welded at all cross points. Rubber, 3" swivel casters, are mounted to kiln-dried hardwood caster boards for strength and durability. Optional Glosstex colors of red, blue, green, gray or white are available. Minimums or up charges may apply to non-standard color applications.

The Poly body is molded from high quality polyethylene and bolted to a rugged powder coated steel frame. Rubber, 3" swivel casters makes for easy transport. Other Dandux colors available.

KNOCK DOWN TRUCKS

Dandux Knock Down Trucks (KD Series) save space and money. The modular knock down design is UPS shippable and permits flexibility in color and options selection. Equipped with a heavy-duty powder coated frame that resists rust and corrosion that is easy to ship, unpack and assemble.

The KD Series is fitted with standard size Dandux Canvas or Glosstex Liners as well as accessories such as Lifts, Sanitary Caps and Sanitary Liners.

This model is ideal for recyclers, laundries, hotels and health-care facilities. Can be used in any application where a Dandux Extra Duty Truck can be found.

FRAME TRUCKS AND BASKETS

Plated & Unplated Frame Trucks & Baskets

Build to suit by using Dandux Plated and Unplated Frame Trucks and Baskets (400-111 & 400-311 Series).

Poly Liner

Frames for Trucks or Baskets can be purchased separately as a replacement frame or in conjunction with a Dandux Fabric or Poly Liner. The frames are made of durable electro-welded spring steel with a plated flat steel base. The base is welded at critical points and comes mounted on kiln dried hardwood runners and caster boards.

Plated trucks are for use in wet or moist environments and unplated for indoor moisture-free applications.

To build a Dandux Plated or Unplated Frame Truck: **BEGIN** with a Plated or Unplated Dandux Basket, **ADD** the desired caster pattern, **COMPLETE** by **ADDING** a Dandux Fabric or Poly Liner. **Refer to Dandux**

Hospital Trucks and Baskets on page 6 for dimensions.

Dandux Plated and Unplated Frame Trucks and Baskets can also be outfitted with a Dandux Poly Liner, available in .225 wall thickness (510072) or .125 wall thickness (510074).

Outlift Trucks

Dandux Plated and Unplated Outlift Trucks utilize a Fabric Liner laced to a Dandux Frame Truck. The liner rests on an external Platform Lift that expands and contracts the liner as parts or merchandise are placed in or removed. This unique ergonomic feature eliminates the need for the operator to bend or reach into the truck bottom when loading or unloading. Having the lift positioned externally completely eliminates the possibility of small parts or merchandise lodging beneath the lift out of sight of the operator, thus ensuring all items are accounted for.

Plated trucks are for use in wet or moist environments and unplated for indoor moisture-free applications. (40011 & 40031 Series + 40-65 Series Liners)

For available sizes and dimensions, see Dandux Plated and Unplated Hospital Trucks and Baskets.

Hospital Trucks and Baskets

Dandux Plated and Unplated Hospital Trucks and Baskets (40011 & 40031 Series + 40-65 Series Liners) utilize a heavy duty Fabric Liner laced to a Dandux Frame Truck. The liner has a double row of rust resistant grommets in a reinforced hem and is easily unlaced for cleaning or sanitizing. The easy to install liner is shipped unattached and is available in white canvas or yellow Glosstex.

Plated trucks are for use in wet or moist environments and unplated for indoor moisture free applications. Top quality casters equipped with thread guards make for easy movement without the binding effect caused by loose threads on the plant or facility floor.

For stationary applications select a Dandux Plated or Unplated Hospital Basket. Both Trucks and Baskets are tapered for nesting and will accommodate all standard Dandux options such as Lifts, Sanitary Caps and Sanitary Liners.

Sizes and dimensions are applicable to Dandux Plated and Unplated Hospital Trucks and Baskets and Dandux Plated and Unplated Outlift Trucks.

Shipping Hamper

Move, store and secure your items with a Dandux Shipping Hamper (40-200 & 40-205 Series). These stationary hampers come standard with a solid one-piece, lockable wooden top that is used to protect valuable merchandise from dirt, dust and pilferage. Ideal for work in process, finished goods, theatrical costumes and equipment, lighting, bands and orchestras, sports teams, boxed and soft goods.

Hamper bodies are available in white canvas or yellow Glosstex. Two models to choose from:

- Series 40 - 200 comes equipped with a permanently mounted hinged top.
- Series 40 - 205 comes equipped with a one-piece detachable top.

The tops for both models can be secured via the permanently mounted metal hasps that can be padlocked to protect the contents.

OPTIONAL CUSTOM TOPS:

- Two piece wood top that is split in the center length wise with 4 hinge points. (Series 40-260)
- A fabric top sewn along one side of the body and secured to the opposite side with buckled leather straps. (Series 40-305) (Minimums may apply)
- Other configurations available based on customer supplied design.

Make your Dandux Shipping Hamper transportable by ADDING casters in the size and caster pattern of your choice.

ADDITIONAL HAMPER OPTIONS:

- Lock rods
- Steel corner plates for extra protection of top corners.

**BASKET SIZES ONLY !!
ADD DESIRED CASTER SIZE.**

Postal Spec Trucks

Dandux Postal Spec Trucks (40-1033 & 40-1046 Series) are specifically built to the rigid specification of the United States Postal Service. Available in 18 Bushel (40-1046) and 8 Bushel (40-1033) models. These rugged trucks have heavy-duty white canvas specially sewn and riveted to a high tensile electro-welded steel frame. The 18-bushel model has six (6) high quality casters with thread guards mounted to kiln dried hardwood runners and caster boards. The 8 Bushel model comes standard with four (4) 3" casters mounted in a "diamond" pattern.

Both models come with an optional metal frame platform lift enclosed in white canvas equipped with "S" hooks. The 18 Bushel also can be outfitted with a plywood platform mounted to the outside of the canvas liner with shock cords and "S" hooks.

See the Dandux Workhorse Trucks for the commercially available version of the Postal Spec Truck.

Workhorse Trucks

Dandux Workhorse Trucks (400-580 Series). Workhorse, the name says it all !!! The Dandux Workhorse Truck is the commercial version of the Dandux Postal Spec Truck. Built for use in extremely heavy workload and abusive environments. Constructed with extra heavy white canvas laced to an electro welded spring steel frame. Six high quality 4" casters with thread guards are mounted to kiln dried hardwood runners and caster boards.

Replacement heavy-duty lace on liners available upon request.

Dandux Multi-Purpose Trucks

Extractor Truck

The Dandux Extractor Truck (40-500 Series) is an exceptionally long truck originally developed to accept wet linen dropped from a laundry extractor and has proven it's worth for multiple heavy-duty applications.

The frame is constructed from rust resistant high tensile spring steel, electro-welded at all critical points. The bottom is plated flat steel welded at cross points and bolted to kiln-dried hardwood runners and caster boards.

The fabric liner comes in a choice of heavy white canvas or yellow Glosstex. The liner is shipped unattached and laces onto the frame for

use or easily removed for cleaning.

High quality casters with thread guards are available in your choice of caster patterns.

Available Options: Plywood lift (400-890 Series) or a Glosstex covered metal frame lift (400-500 Series)

Flatwork Trucks

Dandux Flatwork Trucks are primarily used in laundry operations to feed bulky items such as sheets, linens and draperies into a flatwork ironer. The frames are constructed of high tensile electro-welded spring steel and the bottoms are plated flat steel bolted to kiln-dried hardwood runners and caster boards.

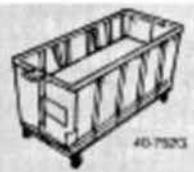

The **four-sided truck** (Series 40-752) is made with yellow Glosstex reinforced at all critical wear points.

The truck comes standard with two permanently attached fabric handles, card pocket and a platform lift made from a metal frame enclosed in Glosstex with eight (8) metal springs mounted inside white canvas sleeves.

These trucks

come standard with high quality all swivel casters equipped with thread guards.

Replacement liners (400752G Series) as well as plywood (400890 Series) or Glosstex covered metal lifts (400752G Series) are available.

8431C) equipped with 3" all swivel casters.

The optional white fabric bag (40-8430) has a reinforced hem which fits over the

spring steel frame; tension from the frame keeps the bag in the "open" position facilitating easy input and removal of items.

The systems comes standard as a single bay unit, but can be customized to any number of bays which is perfect for recycling operations.

DANDUX POLY TRUCKS AND CONTAINERS

Available Poly Colors: Blue, Gray, Red, Green, Yellow, White and Natural. Custom blended colors available upon request
Available Caster Patterns: Refer to Caster Chart on Page 2

POLY BULK HANDLING AND SHELF TRUCKS

Dandux Poly Bulk Handling Trucks

Dandux Poly Bulk Handling Trucks are industry workhorses. Used extensively in laundries, hotels, hospitals, donation centers, recycling operations or wherever bulk movement or storage is required. The distinct profile of a Bulk Truck facilitates greater storage capacity per unit of floor space and increases productivity via more payload per trip.

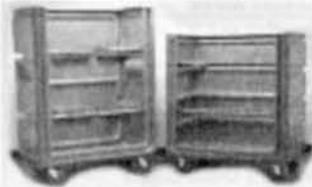

Roto-molded from high quality polyethylene resin, Dandux Poly Bulk Handling Trucks are rugged, tough and virtually indestructible. The smooth seamless body comes in an array of colors to match décor or color code identification and features drain holes for easy cleaning or sanitation.

The base is constructed of powder coated reinforced tubular steel that provides superior strength compared to traditional pan or plastic base models. Four (4), six inch casters are bolted to welded caster plates providing added strength and stability. When ordering, refer to the caster chart on page 2 to select the caster pattern that best suits your application.

Dandux Poly Bulk Handling Trucks are available with an optional security enclosure system and a Shredding Truck option, ideal for housing shredded documents. **See Page 10 for Optional Accessories**

Dandux Poly Bulk Shelf Trucks

Enjoy the best of both worlds! Dandux Poly Bulk Shelf Trucks are designed for double duty. The unique design permits the truck to be used as a Shelf Truck or convert the shelves into a fourth wall to create a Bulk Truck. Known by a host of names such as "Round Tripper" or "Turn Around Truck", one application is in the laundry industry for moving bulk soiled laundry in one direction, then converting into a Shelf Truck for the return of the clean folded linen.

Model: 55QR2821SX

Dandux Poly Bulk Shelf Trucks are available with an optional security enclosure system. This feature provides peace of mind when moving or storing sensitive materials such as expensive merchandise, medications, medical supplies or other items where security is an issue. Our optional "Captive" shelf feature permits the shelf to have a full range of motion, while eliminating the ability to remove the shelf. This prevents the operator from removing and accidentally "leaving the shelf behind".

Model 413820
Metal Transport
Truck

Optional Accessories

- Hand Holes • Tow Packages • Hanger Bars • Push Bars • Card Holders • Wheel Brakes
- Wheel Locks • Cargo Netting • Fabric Dust Covers

Fabric Dust Covers are available in the following styles:

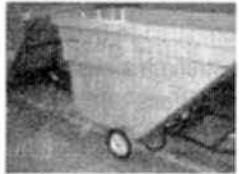

STYLE DESCRIPTION

- A Free hanging roll up cover with straps to secure the cover in the rolled-up position.
- B Same features as Style "A" with the addition of Velcro strips mounted to the truck front to secure the cover in the rolled-down position.
- C Slanted cover that fits like a cap over the top and extends down to cover the open portion of the truck.
- D Slanted cover with a front Velcro front flap that fits like a cap over the top and extends down to cover the open portion of the truck..
- E Full truck cover with a zippered front flap.

TILT TRUCKS

Dandux Industrial Strength Tilt Trucks save time, effort and money when moving bulk items. Used for trash collection, parts movement, wood or metal chips, bulk powders, bulk solids, slurries and food products.

The large capacity body has an ergonomically designed slanted front for easy dumping. The body is rotationally molded as a one-piece seamless unit from high quality polyethylene resin. The frames are constructed from rust resistant powder coated tubular steel for extreme strength and durability. High quality wheels and casters are varied based on the size and model selection.

2 Cu Yd	Utility Duty	523001	(2) 4" Heavy duty stem casters (2) 12" Standard wheels

* The body on the Heavy and Standard Duty models can be released and removed for extra cleaning or replacement.

An optional one piece hinged cover is available to help meet sanitary requirements. This option permits the operator to fill one end of the truck, then the other, without removing the entire cover.

Standard color is Gray, however, optional colors of Blue, Red, Green, Yellow, White, Natural or Custom blended colors are available upon request. Optional colors permit easy identification for departmental usage, infection control or Corporate or Institutional recognition.

AVAILABLE OPTIONS: Hinged Cover, Replacement Liner, Push Bar, Tow Package, Fork Tube Pockets, Replacement Wheels and Casters and a Retro-fit Kit for the Utility Model that includes a Push Bar, Nose Guard and Hardware.

MODEL FEATURES: • Utility Duty: Metal Frame Base - Push Bar optional. • Standard Duty: Metal Frame Base with Push Bar and Front, Back and Upper Lip reinforcement. • Heavy Duty: Metal Frame Base with Push Bar and Front, Back, Upper Lip and Side Girth reinforcement.

TAPER TRUCKS

Dandux Poly Taper Trucks serve a variety of uses too numerous to document. Rotationally molded from high quality polyethylene resin, this durable and versatile truck has application in every industry from A to Z. Whether collecting recycling material, storing goods, moving parts and inventory or food production a Dandux Poly Taper Truck is on the job day after day and year after year. Everything from chemicals to lace finds its way into either a Heavy or Standard Duty Truck.

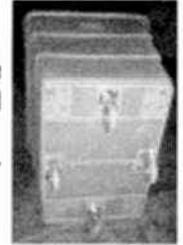

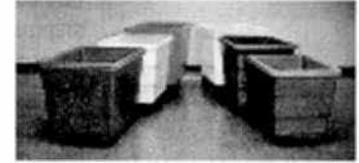

Both models feature rugged step side construction for added wall strength and resistance to bulging. Easy to clean smooth interior surface with encapsulated hardware eliminates snag points better protecting unit contents. Built for use in tough environments, rounded top lip and corner design resists cracking and breaking compared to flat or square lip models.

The heavy-duty model (51-1100 Series) features a reinforced tubular steel base that is far superior to the traditional metal pan base. Welded caster plates support high quality casters with thread guards in the caster pattern that best suits your application.

The standard duty model (51-1200 Series) sports a durable coated plywood base on all models, 10 bushel and above. Smaller sizes have the casters with thread guards mounted directly to the molded body.

With your choice of colors, Blue, Gray, Red, Green, Yellow, White, Natural or custom blended, color-coding and rapid identification is a snap.

Shown with pattern "10" casters

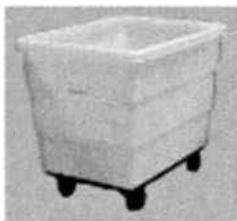

AVAILABLE OPTIONS:

- Straight Sided (Smooth) bodies available upon request.
- Platform Lifts for easy loading and unloading. Mounted via "S" hooks and shock cords the lifts are available in a Glosstex covered metal frame (51-0128) or a metal frame with rigid plastic (51-0127).
- Soft Cover Sanitary Cap provides protection from dust and dirt. (400087)
- Rigid Cover made of lightweight high density polyethylene provides added protection during transport and storage.
- Drainage Systems for easy cleaning or draining liquid contents.
 - Simple capped drain hole
 - Drain assembly with upright rubber hose that secures in place when not in use.
 - Optional "Ball Valves" for retaining liquids.
 - Optional drain racks
- Fork Tube Pockets
- Tow Packages

Dandux USDA Poly Taper Trucks (51-1300 Series)

This special version of the Poly Taper Truck is ideal for food and pharmaceutical processing. Available only in **Natural** color, this unit is constructed using resins and manufacturing techniques that are accepted by the USDA. The easy to clean surface, coupled with encapsulated

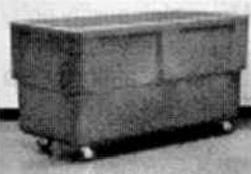

hardware and a capped drain, facilitates cleaning and sanitizing. Available with an optional drain hose.

High quality casters with thread guards are attached to the body in one of two caster patterns, either all swivel (Pattern 20) or 2 rigid and 2 swivel (Pattern 60).

Poly Box Trucks

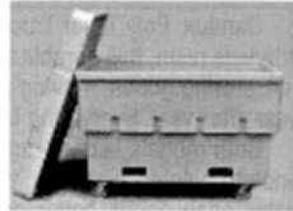

511605

Dandux Poly Box Trucks (51-1605 Series), are rectangular in shape optimizing usable cube space. The rectangular shape makes it easy to stack boxes, packages, folded linens and towels and keeps the items in the stacked position during transport.

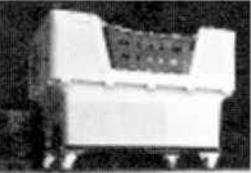

The truck bodies nest approximately 1/3 their depth when empty. This feature conserves expensive floor space and reduces cost on in-bound return shipments when used to "Cube-out" a local delivery or over the road truck.

Roto-molded from high quality polyethylene and designed with broad, flat, vertical sides, and our unique double wall upper flange that minimizes impact when contacting with walls and doors. These features make the unit durable as well as functional.

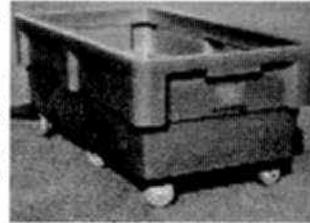

The base is constructed from powder coated reinforced tubular steel that provides stability and strength. Casters with thread guards are mounted either all swivel (Pattern 20) or 2 rigid and 2 swivel (Pattern 60). Optional (Pattern 80) which is six (6) casters can be mounted by request.

511608

511667

Poly Step Truck

The Dandux Poly Step Truck (51-1505 Series) is a heavy-duty version of the Step Side Poly Taper Truck. This workhorse has application in a multitude of industries. Constructed with a seamless body, rounded surfaces, double wall lip and rugged step sides for superior strength, this is a "Get It Done" Truck.

Available in Blue (Standard), Gray, Red, Green, Yellow, White, Natural or custom blended colors.

See Dandux Poly Box Trucks for available options.

Poly Flare Trucks

Dandux Poly Flare Trucks are jumbo, sturdy and easy to maneuver. Ideal as a laundry extractor truck or for moving piece goods, dry chemicals, solids, parts or finished goods. The seamless bodies are molded from high quality polyethylene and are available in Blue (Standard), Gray, Red, Green, Yellow, White, Natural or custom blended colors.

The base is powder coated reinforced tubular steel for a solid foundation. Top quality casters are available in either all swivel (Pattern 20) or 2 rigid and 2 swivel (Pattern 60).

The heavy-duty model (3400) features the tubular steel base in addition to steel reinforcement along the side girth of the truck. The extra heavy-duty model (3500) includes the same features plus steel reinforcement supporting the top lip.

Utility Bulk Movers

Dandux Utility Bulk Movers are known in the industry as "Big Blue"! These massive trucks are sized and built for king size movement and storage. Heavy-duty powder coated reinforced tubular steel makes up the frame for these large one-piece roto-molded bodies. Six (6) 6" casters (Pattern 80) permit these giants to handle large payloads yet remain mobile.

Skid Boxes

Dandux Skid Boxes are a must for any manufacturing, storage or over the road operation. Forkliftable, positive stacking, and non-corrosive. Extremely cost effective compared to cardboard, plywood or metal.

Notched bases provide positive stacking while exterior leg design creates load-bearing columns for heavier payloads. Sizes range from 5 to 110 cubic feet, in single and double wall models. Custom dividers, bases, frames and dollies complete the package. Double wall models feature reinforced smooth interior sides and bottoms, ideal when the load requires a flat non-foot printed surface.

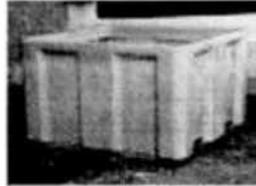

Excellent for use as a Reusable Shipping Container. For other size options see Dandux Custom Poly Shipping Containers.

Pallet Tubs

Dandux Pallet Tubs are manufactured using our high quality polyethylene resins producing a seamless, smooth and chemical resistant tub. Like our Skid Boxes and Custom Shipping Containers, Dandux Pallet Tubs are essential for over the road shipping. Most models nest reducing space and cost on the in-bound trip as well as warehouse floor space when not in use. Foot-printed lids permit vertical stacking. Lids can also be modified with casters to function as a custom fitted dolly.

Load Dumper

Experience the advanced patented design of the Dandux Loadumper. Ergonomically engineered for ease of handling. Since there is NO LIFTING REQUIRED heavy loads can be easily transported with reduced strain on the operator.

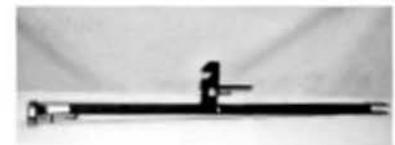

Unique ergonomics makes this Material Handling Cart as useful inside the plant as it is on the outside. Ideal for movement of heavy parts, bulk solids, powders, dry goods, concrete, salt or landscaping materials.

Our patented Tow Assembly easily attaches to any tow vehicle and permits loading and unloading without the need to disconnect the cart.

Flat Hauler

TOW ASSEMBLY

Tote Boxes

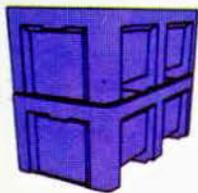

To complete your Material Handling needs, inquire about our full line of Dividable, Nestable and Stackable Tote Boxes and Trays.

Canvas Baskets & Trucks

DANDUX offers an extensive line of canvas basket, hampers and trucks. Styles include Extra Duty (sewn on liner), Frame Trucks (lace on liner), Net & Bag Holder sorting system, Wood top Shipping Hampers, Extra Heavy Postal Specification Trucks and a variety of shapes and sizes to meet your needs. (Available in plain white canvas or yellow glosstex, lace on liners available in six optional colors).

Skid Boxes

DANDUX Skid Boxes feature interlocking legs for secure stacking. Available in many sizes and styles (double or single wall). Easily fork truck liftable for transporting.

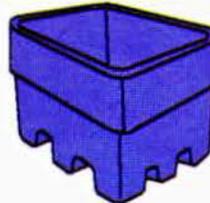

Tilt Trucks

DANDUX Tilt Trucks are ideal for collecting, moving and dumping materials. Available in six optional colors. Sizes: 1/2, 1, 1 1/2, & 2 cubic yard capacity.

Poly Box Trucks

DANDUX Box Trucks are the strongest unit of its type available. The unique Double Wall Flange provides superior strength when handling heavy loads. (Available in 12,16,18,24,32, & 42 Bu.)

Palletubs

DANDUX Palletubs are ideal for in plant bulk storage. Fork truck liftable, with snag-free interior units are stackable on lids and nestable when empty. (Six optional colors, blue standard).

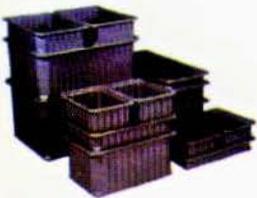

Poly Shelf Trucks

DANDUX Poly Shelf Trucks easily convert from shelf to bulk configuration. Ideal for laundry, housekeeping or factory application. Many standard sizes with removable or captive shelves.

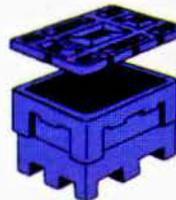

Poly Bulk Trucks

DANDUX Poly Bulk Trucks are ideal for handling large loads. They are designed to handle large loads while maximizing space. Available in six colors (blue standard) and many sizes.

Modular Tote Boxes

DANDUX Dividable Mod Boxes and Nestable Shelf Boxes are the largest selection available. Over 100 sizes to best meet your needs. Mod line tote box carts available for many sizes.

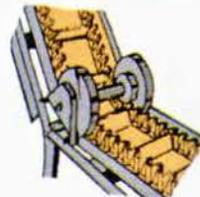

Shipping Containers

DANDUX Reusable Shipping Containers for in-plant, over the road or out of the country movement of goods. Dimensioned to maximize container cube. Units stack on lids, nest when empty.

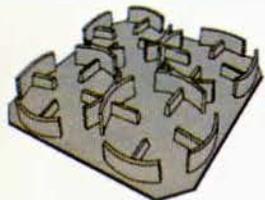

Tote Boxes

Available in nesting, stacking or stack & nest styles Dandux totes are an efficient means of carrying and sorting an assortment of items. Available in an extensive selection of over 250 sizes.

Conveyor Belting

DANDUX has a complete line of conveyor belting including cotton, polyester air slide, light weight rubber, foor grade, incline and heavy rubber. All custom fabricated to your specs.

Custom Molding

DANDUX has both the molding capabilities and engineering talent to produce a wide range of custom products to your specifications. Capabilities range from light weight vacuum forming to extra heavy duty rotational molding. Designs can range from large, small, single or double wall.
