## Ultimate flexibility - Heavy duty - Mobile

- No lane profiling needed— works with almost any size carton - no need to set lane widths.
- Perfect for applications where carton/tote widths vary.
- Super easy installation—bolt on casters, snap in beams, drop in tracks ... that's it.
- Racks easily move to where they are needed.
- Increase space utilization by up to 50%.
- Boost production efficiency.
- Parts angle towards the picker for fast, easy organized picking.

We now also offer galvanized steel flow racks that can be used in any refrigerated or freezer applications to prevent rust that will appear on painted steel.

Also for applications where customers want to be able to wash down the racks. Our galvanized racks are ETL certified for use with packaged foods. We can also make stainless steel flow racks. Available sizes are from 2' to 8' wide by 2' to 20' deep.

We can make galvanized traditional flow rack with Kenrail roller tracks as well as galvanized racks using our BeamTrack (roller conveyor style) and BeamDeck (skatewheel conveyor style). We can also make these racks mobile, so they can be easily moved.
