

Tub and Undercarriages

There's more to these tubs than meets the eye. Start with versatility: they can be used for transporting, freezing and storing. Then there's variety: they're available as stand-alone items or with regular or low steel undercarriages. You can also specify an optional drain plug, and (in orders meeting a minimum quantity requirement) your choice of colors.

Undercarriages

Undercarriages available in galvanized and stainless steel.
