SINGER SAFETY COMPANY
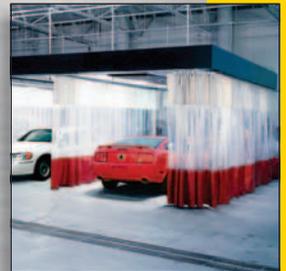

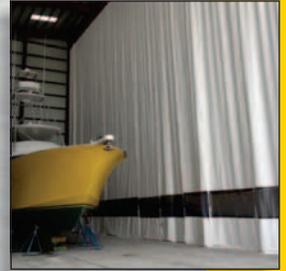

Since 1950

The National Leader in Industrial Barrier Protection Products

Catalog 534

Glidewall Kits offer low cost, easy assembly, quick entry/exit, plus the ability to expand plant design as requirements change.

Now Available in Standard Size Kits

Kits consist of panel, steel track, chain suspended connector, threaded rod adapter, end stops and 2 wheel nylon roller hooks.

Super-Vision Series

Features a 52" high clear vinyl center section that starts 30" up from the floor. The top section will vary according to your height requirements. Each partition is furnished with two, 2" wide x 1' long Velcro® strips on each side to provide easy access and yet assure a tight seal. A zinc plated chain is installed in the bottom hem. Opaque vinyl panels are available in white, yellow, blue, green, red, gray or black.

Height	Width	Part #

12'	6' straight	14071612
12'	8' straight	14071812
12'	10' straight	14071012
12'	4' curve	14776412

Weld-Vision Series

Similar to Super-Vision with the exception of a see-through center section made of Trans-Vue yellow, orange, blue, green or smoke gray. The 30" high transparent section starts 48" up from the floor. Opaque vinyl panels are available in white, yellow, blue, green, red, gray or black. Hem chain and Velcro® included.

The use of this product is not a substitute for personal eye protection for sustained viewing of welding operations.

SINGER SAFETY COMPANY

Ventilator™ Series

Provides ventilation for doorways, docks or enclosures on booths. Block out pesky bugs and birds the safe and friendly way. Works great as a sun screen.

• Available in heights up to 18' tall. Features an open weave vinyl-coated polyester mesh fabric especially for extended outdoor use. A zinc-plated chain is installed in bottom hem. Excellent resistance to ultraviolet light, mildew, stains and weather. Moisture resistant, dries quickly.

• Available as single panels which glide along track. A steel staff in the panel side attached to 2-wheel roller in the track allows for easy operation. Panels secure with full length Velcro® on vertical edges for safe and easy access to outdoor areas.

Panels available in white, blue and black.

MEASURING

Choose from the following overhead views of System layouts.

Straight Run

Two-Sided

Three-Sided

Four-Sided

"T" Divider

Dual Prep
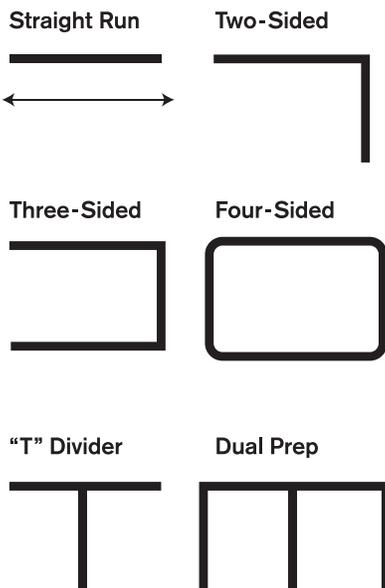

How To Measure A Glidewall Partition System:

1. Select type of system required: Super-Vision, Weld-Vision, Privacy, Ventilator or Environmental Series Partitions.

2. Measure the area to partition or enclose. System layouts can be a straight run, two, three, four-sided or multi-station partition. Factory adds 10% to curtain width for drape.

3. Determine the height and order partition system to exact height required. (Normal tolerance is +/- 1"). Floors are not always even, take measurements from highest point of floor. Factory deducts 2" from curtain height to allow for track and rollers.

4. Select desired hanging or mounting method. Standard mounting is for suspension from chain. Threaded rod, flush-to-ceiling or wall mount available at no additional charge. (Advise type of connector required at time of order.) Free-standing (to 12' high), or double track with connectors mounting methods are available at an additional charge. **(See page 4 & 5 for hardware options)**

5. Strip doors can be included with systems for an additional charge.

Custom Designed Solutions

Our knowledgeable staff can assist you in solving specific or unusual in-plant, safety and noise problems. We can recommend the right combination among our standard products, or we'll design custom solutions that fit your particular needs.

WELDING STRIPS

SINGER SAFETY COMPANY

Portable Safety Screens
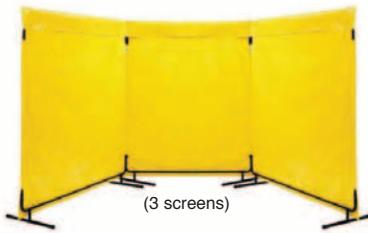

(3 screens)

Screens are shipped complete with 18 gauge tubular steel frame, slip-on envelope style curtain panel, platform legs, two **Add-A-Panel Clips** and assembly instructions. Each screen can be used alone or joined together with **Add-A-Panel Clips** to form multi-panel (2, 3 or 4 sided) enclosures, or straight line barriers. The portable safety screen can be made with almost any of the raw materials from page 8. Screens are a also available with grommets on all 4 sides. Custom sizes are available in 4', 5', 6' and 8' increments. Call for a quote.

Roll-Up Safety Screens

Screens can be rolled-up and easily carried from place to place. Construction features two layers of material reinforced with a 14 gauge galvanized wire mesh. Roll-up screens have a built-in handle and convenient storage strap. Flame resistant.

Cotton Duck material is treated with a permanent, paraffin-based finish which resists water and mildew.

Safety-Striped Vinyl resists fire, water, mildew, oils, alkalis and most acids. Yellow and black striped.

Roll length can vary by 10%. You will be invoiced for exact length of roll.

Made-To-Order Products
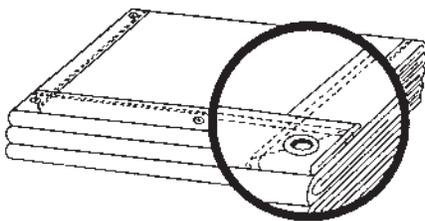

Above materials also available on a **Made-To-Order** basis for Portable Safety Screens, Track & Roller Partitions, Welding Blankets, Covers, Curtains with S-Hooks and Do-It-Yourself Barriers. Blanket and Partitions include hems on four sides, sewn with nylon thread and 3/8" I.D. nickel plated brass grommets. Blankets provided with grommets at corners only. Partitions provided with grommets 12" on center along the top; extra grommeting provided at no charge upon request. Small S-hooks, jumbo S-hooks, velcro, hem chain and other accessories are available **(see pg. 7)**.

CALL FOR A QUOTE
All "Made-To-Order" Blankets, Covers, Cut Yardage and Partitions are non-returnable.

Acoustic Foams
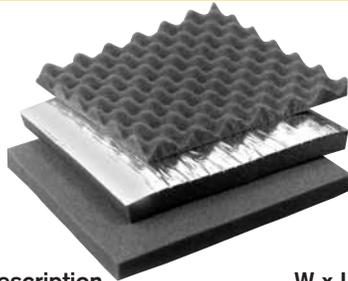

Excellent absorber particularly in the mid-to-high frequency noise ranges. Good structural integrity and requires little mechanical support. Easy to cut and fasten to almost any surface with a water-based adhesive (available below). Convoluted foam features smooth round cone-shaped peaks and valleys which redirect sound waves into the foam where the sound is converted to kinetic energy and absorbed. Convoluted foam gives you 4 times more absorptive surface than flat foams. Standard flat and Aluminized flat foams are sold in rolls, convoluted foam is sold in 4 sheets per box.

Ceiling Baffles

Baffles are hung vertically from the ceiling to absorb and dissipate reflecting noise. Poly Baffles are a high-density fiberglass core sealed in a polyethylene cover. Quilted Fiberglass Baffles are two-inch thick fiberglass quilted with a vinyl-coated fiberglass facing cloth. Available in grey or white. All baffles contain a non-combustible fiberglass core, with a fire retardant cover.

Absorbers can be hung in parallel rows two feet apart, or in an egg-crate configuration.

Extinguisher, Hose Reels, Racks & Cart Covers

Not Sure That It Will Fit?
Our covers are designed to fit most popular sizes of fire equipment. We waive the restocking charge and small order fee if you order a cover on a trial basis just to see if it fits. With a minimum order of 12 covers we can provide made-to-order sizes for any type of fire equipment. Call, fax or email us at singersafety@singersafety.com a sketch for a prompt quote.

Note: Made-To-Order sizes are non-returnable.

All Fire Equipment Covers are made of vinyl-coated nylon in Fluorescent Orange Color. (Any order of 24+ covers, use discounted prices. Must 24+ of same cover.)

## Fire And First Aid Blankets

- Blankets are 70% Wool, 30% Synthetic, 62" x 80", with stitched edges.
- Pouches are made of nylon, vinyl-coated on both sides to withstand the elements. Nylon stitched black binding on all edges and seams.
- No fumbling in an emergency; eye catching fluorescent red color.
- Velcro® fasteners open instantly.
- Built-in handle with two nickel plated grommets for mounting pouch on wall.
- Blanket cannot be machine washed.

Flex-Vue™ Vinyl Strip Doors & Roll Goods

Order by the Full Roll (uncut), or have us cut replacement strips to size and punch holes for mounting. Hardware sold separately. F.O.B. Chicago, IL (Class 55)

Partial Overlap 8" & 16" Wide Strip

Full Overlap 8", 12" & 16" Wide Strip

Partial Overlap 12" Wide Strip

Concave/Convex Curvature

Concave/Convex curvature allows all strips to be interlocked when hung, forming an excellent seal.

8" Wide Strips are recommended for doors up to 8' in height. 50% overlap for interior doors, 100% overlap for exterior doors.

12" Wide Strips are recommended for doors 8-14' in height. 67% overlap for interior applications and forklift traffic. 100% overlap for exterior applications in extreme wind or sound.

16" Wide Strips are recommended for doors 12' and higher with best resistance to wind, sound and temperature differential. 100% overlap for severe sound attenuation.

Ribbed Strips offer less abrasion and scratching to stay clearer longer than standard strips. Ribs increase insulation by providing small air pockets while reducing contact and static cling between strips. Recommended for heavy duty traffic, forklifts, etc. 0 degrees to +150 degrees F.

USDA Freezer Strips are used for lower temperature applications and are USDA approved. -30 degrees to +150 degrees F

Anti-Static Strips are used mainly in areas where static build-up could be harmful. 0 degrees to +150 degrees F

Safety-Orange Strips are used for safety areas, mark door openings, or to enclose hazardous areas. 0 degrees to +150 degrees F

Tolerance +/- 1.00" on cut strips, +/- 10% thickness

Vinyl Strip Order Estimation Guide
Determine square footage of opening. Select desired strip width and choose "Partial" or "Full" overlap. Use multiplier below to determine quantity required.

Width	Partial	Full
8"	X 2	X 3
12"	X 1.5	X 2
16"	X 1	X 1.5

Example: 13' x 8' Door with 8" full overlap
13 x 8 x 3 = 312 linear feet of 8" vinyl strip required.

Flex Mounts (Universal 3-in-1 Mount)

Three mounting options in one piece of hardware! Mount to overhead surface (inside doorway), wall or suspend with threaded rod (not included). Order by the linear foot to the same width as your opening. (Up to 8' can ship UPS.) Other mounts available, call for quote. All hardware is galvanized and **comes with 3 snap caps per foot.**
