Green Attributes and Advantages of Allied Modular's Construction

Allied Modular Building Systems, Inc.
Eco-Friendly Construction

- ✓ **Reusable** – Allied Modular walls can be easily disassembled and relocated, reducing the demand for raw materials and minimizing the amount of energy expended.
- ✓ **Recycled** – Aluminum raceways, glass, gypsum and wood doors used in Allied Modular systems are manufactured from partially recycled materials. In addition, the entire wall system can be recycled.
- ✓ **Regional Materials** – Allied Modular systems are manufactured in two plants located on both sides of the country (Orange, CA & Nashville, TN) shortening necessary shipping distances.
- ✓ **Minimize Waste Due to Precision Cutting** – Manufacturing in a factory means materials are used more efficiently. On-site cutting and waste is reduced.
- ✓ **More Efficient Use of Materials** – Factory manufacturing allows Allied Modular to reuse excess materials and recycle materials that cannot be reused.
- ✓ **Less Material Exposure to Inclement Weather** – Less risk of moisture being trapped in materials, cutting down on indoor air quality issues due to mold.
- ✓ **Less Site Disturbance** - Dramatically reduces time and impact on the surrounding site. Reduces noise, dust, and damage to existing site landscape and neighborhood. Also, reduces the number of vehicles and equipment needed at the site. Less site trips are required to install the wall system.
- ✓ **Improved Environmental Air Quality** – Eliminating cutting on site means less construction particulates contaminating on-site air. Air quality is better for construction crews and future tenants.
- ✓ **Safer Construction** – In a factory environment workers are assigned a work station and supplied appropriate equipment needed to provide the safest work environment possible.
- ✓ **Built to Code with Shorter Build Times** – A modular building will meet local codes with the same or better quality in less time.
- ✓ **Energy Savings** – Our standard wall system provides an insulating factor of R-14 without additional insulation. Less energy is required to maintain room temperatures, saving money, fossil fuels and reducing carbon emissions.

Fast, Affordable and Green The Perfect Solution

Allied Modular Guard Houses and Security Booths

Provide security and accountability to your business, while accommodating comfort for personnel with Allied Modular's Patriot™ Guard Houses.

Using an advanced framing system and 4 inch thick panels, Allied's guard houses and security booths can easily be designed, configured or relocated any time. Units are shipped pre-assembled on a fork-liftable mobile base for your immediate use.

We offer a wide variety of finishes and options including wall mounted HVAC, countertops, sliding windows, doors, exterior lighting, integrated electrical, data and phone jacks and many more. Boasting the largest selection of options than anyone in our industry, we provide you the ability to configure a look and feel that is perfect for you.

Allied Modular's Guardhouses and Security Booths are engineered to meet or exceed your local building codes, seismic zone, wind and snow loads.

Allied Modular's Advantage

- Shortens Construction Time
- Flexible and Cost Effective
- Re-usable and Re-locatable
- Less Mess and Cleanup
- No Painting or Patching
- Class A Gypsum Panels Standard
- Superior Sound & Thermal Values
- Anti-Corrosion Framing System
- Easily Upgrade Features or Size
- Permits In All 50 States
- CA, TN, TX Manufacturing Plants

Available Options

- Steel, Aluminum, FRP Facings
- Largest Color Selection
- Steel Doors Standard
- Full Glass Sliding Doors
- Dual Pane Windows
- Heat and Air Conditioning
- Exterior Lighting
- Phone and Data Jacks
- ADA Hardware and Ramps
- Specialized Electrical and Networking Receptacles

Our System is so flexible and adaptable, it can be used for:

- Security Booths
- Information Booths
- Service Booths
- Vision Towers
- Concession Stands
- Stadium Press Boxes
- Storage Enclosures
- Parking Attendant Booths
- Smoking Shelters
- Ticket Booths
- Mobile Security Units

DESIGN-BUILD APPROACH PROVIDES A TOTAL END TO END SOLUTION.

Fast, Affordable and **Green** The Perfect Solution

Modular Office Partition Walls

Enjoy minimal costs and complete functionality with our modular partitions. It is office partitioning at its best. Our highly functional demountable partitions serve as effective office partition walls, warehouse separation walls, classroom partitions, temporary walls, or full-height partitions. Go far up with our tall walls. Add style with our glass partitions.

Modular office partition walls are inexpensive comparable to other standard construction methods. It is less expensive to use a full height modular partition than it is to buy a half height workstation. Demountable wall partitions can be moved or reconfigured as your company's change requires. Our Modular walls are panelized into sections to make segregating your offices easy. Our partition systems can be fully integrated with electrical and data jacks. Modular door panels and window panels make designing your layout easy.

Our System is so flexible and adaptable, it can be used for:

- Portable Offices
- Executive Offices
- Administrative Offices
- Warehouse Offices
- Office Complexes
- Shipping and Receiving Offices
- Production Offices
- Conference Rooms
- Supervisory Offices
- Lunch Room or Break Rooms
- In-Plant Offices

Allied Modular Two Story Offices and Enclosures

When your business needs demand additional office space, build up and maximize otherwise unused air space. Whether you need to provide space for one person or a thousand people let our design experts help you design an application that will fit your business process. We use lean workflow experts to analyze your space needs and processes to maximize efficiency throughout your organization.

Two-Story offices and enclosures can be built with or without a steel mezzanine. Modular framing allows virtually endless configurations, upgrades or add-ons.

With now the largest selection of colors, wall types, options and styles than anyone in our industry, we provide you with an unlimited range of choices and the ability to configure a look and feel that is perfect for you.

Fast, Affordable and Green The Perfect Solution

Allied Modular Vision Towers

Provide your team leaders, supervisors or production managers an unobstructed view to your operations.

Our Vision Towers are an excellent solution for providing unobstructed supervisory or security views while maximizing the use of expensive floor space below. All Vision Towers are built on heavy-duty structural steel mezzanines and typically sit 5 ft. to 12 ft. above ground level. Combined with Allied's modular wall systems, its easy to design and configure any structure to meet your company's requirements.

Our products are engineered to comply with the seismic zone requirements in your area so you can be completely confident in your choice.

Fast, Affordable and Green The Perfect Solution

Allied Modular Machine Enclosures

As automation technology changes, there is an ever changing need to control environments. The costs of equipment has escalated so high that any maintenance issues, parts rejection or downtime can be expensive.

By isolating your machines you reduce the rejection rate of your output. Providing a consistent environment for your machinery reduces the overall maintenance costs inherent in a dirty machine shop. By providing an enclosure or room around your sensitive machinery your customers know that you understand quality.

We can manufacture units for virtually any application. We look at the overall throughput of your production to make sure the enclosure does not impede on your profitability. Most of the time there is no impact of downtime adding this enclosure. These buildings can have built-in temperature controls to reduce or eliminate your rejection rate.

Fast, Affordable and **Green** The Perfect Solution

Allied Modular Tall Walls

Allied Modular TallWall™ is the ideal solution when you need separation between processes. TallWall may also be used as a demising wall to divide into several smaller sections to rent or lease.

With heights up to 35 feet, and 3 to 8 inches thick, TallWall can be disassembled, moved and reassembled without losing your initial investment.

Construction is quick and seamless as we work around pipes, trusses and more, while adding windows, doors and electrical outlets where needed.

With now the largest selection of colors, finishes, options and styles, than anyone in our industry, we provide you with an unlimited range of choices and the ability to configure a look and feel that is perfect for you.
