

OPEN END

LIFT TRUCK HOPPERS

The uniquely designed Apex Open End Lift Truck Hopper is made to handle long bulk materials such as lumber, tubing, bar stock, shear scrap, extrusions, etc.

This versatile hopper is fabricated from 7 gauge steel plate with additional angle iron reinforcement. The end supports are formed 1/4" steel burnouts, providing additional strength and durability. The hopper body is mounted on a solid fork lift base having 1/4" thick fork pockets, 3" structural channels, 3/16" and 3/8" thick angle iron, 1" thick "S" stops, and a 1/2" thick steel burnout handle assembly. The unit is painted with Apex standard bright yellow machine enamel.
