MACHINE GUARDING

Keep your employees safe.

Any machine that moves can pose a risk to employees. We can help you comply with OSHA and other regulatory bodies that set the standards for where and how workers are to be protected. Machine guarding is often the best way to ensure a safe environment and drastically reduce the potential for accidents and fines.

Do you want to avoid
workplace injuries?

Do you have exposed machinery
with moving parts?

Do you want to stay compliant and
up-to-date with industry regulations?

Would you like to avoid
regulatory fines?

Would shutting down production have
a big effect on your bottom line?

If you answered yes
to any of these, then
you need Velox.

Velox

What makes Velox Different?

Velox machine guarding allows you to quickly and easily create a safe perimeter for you and your employees. Velox installs quickly, offers high-visibility and can be modified in the field to suit your specific needs, helping you to protect employees and avoid accidents.

Lightweight, yet strong 8-gauge wire panels.

Pre-welded clips allow you to quickly lock panels in place.

Reinforcing ridge adds extra stability without adding weight.

Our posts give you the greatest strength and stability in the market.

Cut-to-fit panels

Sometimes standard sizes don't work for every application, so we made each panel customizable. Simply cut in the field to create the perfect fit. When panels are resized, bolt-on clips can replace standard welded clips, making Velox incredibly versatile.

Fast assembly

Velox is the fastest assembling machine guarding product in the industry. Our patented hook fasteners slide quickly into the slots on each post. The attached fastener is then simply threaded into the slot to lock the panel securely in place.

Quick Ship Guarantee

Quickly bring your facility into compliance with safety standards. Many Velox machine guarding components are eligible for our 48-hour ship program. Contact us to learn more.

Configure Velox machine guarding to meet your unique safety requirements.

PANELS

Height

Choose 6 or 8 feet of protection. Standard panel guards are 66" high which allows a 6" sweep at the floor. If you need an 8' barrier, simply get 8' posts and add a 24" panel to the top for added protection.

Width

Choose from 10 panel widths starting at 10" all the way to 94".

Available widths:

10" / 22" / 28" / 34" / 40" / 46" / 58" / 70" / 82" / 94"

READY TO SHIP

Everything you see here is in stock
and ready for quick shipping.

DOORS

Add an access point to any part of your Velox machine guarding. Choose from several options:

A swinging door, a double swinging door or a sliding door which you could move large equipment through.

Each door can work in 6' or 8' height configurations.

Shown below: ① 8' swing door / ② 6' swing door / ③ Double swing door / ④ Single sliding door / ⑤ Double sliding door

POSTS

We offer four kinds of posts for maximum flexibility, including basic posts for straight lines and 90 degree corners and adjustable corner posts for inside corners and odd angles.

Additionally we have two kinds of door posts to accommodate swinging and sliding doors. All posts are available in 6' or 8'.

Shown above: ① Line or corner / ② Sliding door

③ Swing door / ④ Adjustable corner

LATCHES & LOCKS

Outfit your doors with a regular latch or an interlock that turns off machinery when opened.

Shown above: ① Standard latch / ② Interlock

SPECIALTY ITEMS

Special sizes, Lexan and sheet metal panels are also available.
