

New

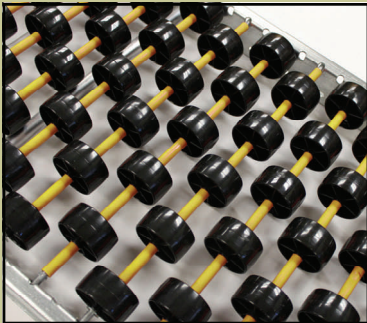

Large 1.9" diameter X 1" wide rollers

Skatewheel style carton flow ... the most flexible carton flow available

Beamdeck carton flow

Keneco, Inc.—The carton flow experts

Keneco, Inc.

- Ultimate flexibility – no lane profiling needed, works with almost any size cartons.
- Perfect for applications where carton/tote widths vary.
- Large 1.9" diameter polyethylene wheels with steel axles.
- Low profile – installs in between beams to save vertical space.
- Easy installation – Drop in design, attaches with full length galvanized steel hangers to step, box or structural beams.
