

We Will Solve Your Mobility Problems

Nutting®

Order Picking Platforms

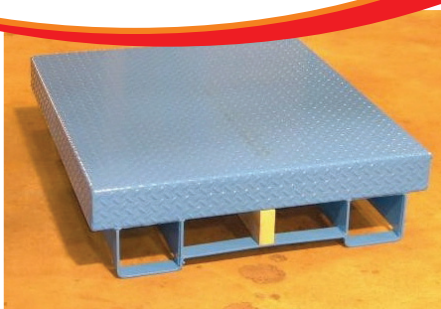

are used in conjunction with electric order pickers to increase productivity and safety.

All models include safety features: forkguides with stirrups, hardwood clamp block and flush interface between platform and electric order picker.

Models built to suit specific applications. Available in any size or capacity. Choose from steel, aluminum or wood deck.

Available in three configurations:

- 1. Platform "skid" – rigid legs for stationary applications.*
- 2. Platform "truck" – with swivel and rigid casters for mobile applications.*
- 3. Platform "trailer" – with swivel and rigid casters and couplers for towing applications.*
