**SAFETY PRODUCTS**

# Safety Gates

Manufactured to the same standards as our Steel Guard® and Armor Guard® railing, the safety gates can be ordered as part of a new installation or retrofitted into an existing system.

- Steel King's Self-Closing Safety Gates use heavy, 11-gauge corrugated steel rails and are designed to fit a 48" post-to-post center line within a protective railing system.
- The gate is shipped with hinge assembly on one side of the gate and two gate stops on the opposite side.
- Hardware is included and the gates will bolt to the existing posts of a Steel Guard or Armor Guard protective railing system.
- The Safety Gates are easily installed without cutting, welding or drilling.
- Steel King's Self Closing Gate's swing direction is versatile, which allows you to re-purpose gates as required. Changing the direction of the gate is as simple as removing a few bolts and flipping the gate in the direction needed. Steel spring automatically closes gate after passage is
- Gates are shipped completely assembled and ready for installation.

**Steel Guard Features**

- Rails: Two corrugated 11-gauge steel, 14-1/2" high, three ribs
- Gate Dimensions: 38-1/2" tall and 43-3/4" wide
- Powder coat finish (yellow) –highly visible, durable and UV resistant
- Hinge assembly and gate stops assembled on gate
- Versatile: Gate can be turned/flipped to achieve desired opening direction
- Easy installation – no cutting,welding or drilling required
- All hardware and end caps included

Model #		Description	Wt. Each	Price Each
SGSLG-048	Yellow	Steel Guard Safety Gate	100#	\$510.00

**PORTABLE RACKS**

## Stac-King Portable Racks

With Steel King's Stac-King® portable racks you can protect your loads during handling, stacking and shipping. Stac-King racks act as their own pallet, eliminating the need and cost of wooden pallets.

The Stac-King rack's vertical posts allow the racks to be stacked up to six units high, without load-on-load contact: helping to eliminate product crush damage.

- 4-way (short-fork) base
- Open or wood board deck
- Three base sizes
- Two post sizes (sold separately)

**NOTE: LIMITED QUANTITIES ARE AVAILABLE FOB ROME, GA.**

**Notes to Upright Capacities**

- Capacity is based on 36" vertical beam spacing. Larger spacing decreases capacity.
- Capacities based upon interior usage.
- Capacities are for selective rack only.
- Capacities are for non-seismic usage.
- All columns/posts must be anchored to an adequate concrete floor (required by RMI code).
- Capacities based upon installation in a plumb condition.
- Capacities are total per upright, assuming equal loading on both posts.

If any of these conditions do not apply to your application, or if you are unsure if they apply, **DO NOT USE THESE CAPACITY RATINGS.** In those cases, contact Steel King's Engineering department for design information.

**NOTE:** A Permit and/or stamped calculations may be required by the local building department prior to installation and is the responsibility of the end user.

**800-441-9955**

**\* Notes to Upright Capacities**

- 1) Capacity is based on 36" vertical beam spacing. Larger spacing will decrease capacity.
- 2) Capacities based upon interior usage.
- 3) Capacities are for selective rack only.
- 4) Capacities are for non-seismic usage.
- 5) All columns/posts must be anchored to an adequate concrete floor (required by RMI code).
- 6) Capacities based upon installation in a plumb condition.
- 7) Capacities are total per upright, assuming equal loading on both posts.

If any of these conditions do not apply to your application, or if you are unsure if they apply, **DO NOT USE THESE CAPACITY RATINGS.** In those cases, contact Steel King's Engineering department for design information.

NOTE: A permit and/or stamped calculations may be required by the local building department prior to installation and is the responsibility of the end user.

**PALLET RACK & ACCESSORIES**

**SK3000® Structural Rack**

- Channel beams have a 7-gauge connector, featuring a wrap-around design with round holes, not slots.
- Beams are bolted to the upright frame. Each end of a load beam is bolted to the column with two, grade-5 bolts and nuts (included).
- Beams are easily adjustable in 2" vertical increments.
- Beams are pre-punched for easy installation of bolt-in beam ties.
